Final Projects Work Session 1

CNRI Fall 2021

Main Objectives Today

- Collect/Create all stimuli needed to run study
    - If these are images, collecting those images and putting them into a folder
    - If these are text descriptions, writing out all text descriptions for variables
    - If using single words, writing out words and creating variable adjustments (e.g., setting color dynamically)

- Create display screens for each piece of study
    - Fixation cross screens
    - Feedback screens
    - Trial screens
    - Etc.

Main Objectives Today

- Create randomizations if you have any
    - Randomizing position
    - Randomizing order of presentations
    - Randomizing condition assignments
    - *If you get here, let me know, we can create a randomizer function that can be used for assigning most of your randomization things*
